

Dr. Kamen has affiliated with the Cleveland Eye Clinic.

Cleveland Eye Clinic

SHELDON D. KAMEN, M.D., INC.

To all my Colleagues:

For over 30 years I have had the privilege of caring for your patients in the Bedford and Cuyahoga County area. We have had outstanding support from each of you, and for this we are deeply grateful.

I am pleased to inform each of you of my decision to affiliate with the outstanding doctors of the Cleveland Eye Clinic, and to thank each of you for your support personally. Joining me are Drs. William Wiley, Thomas Chester, and Nagureddi Krishnan. Their professional bios have been inserted for your review.

For over 60 years, the Cleveland Eye Clinic has been one of Ohio's premier independent ophthalmologic practices with an extensive level of eye care services available. During this time the physicians of the Cleveland Eye Clinic have been leaders in many aspects of eye care including: cataract surgery techniques including Crystalens. Other procedures and services include Lasik surgery, glaucoma laser treatments, radio wave surgery (CK), dry eye therapy, and the evaluation and treatment of many other ophthalmic conditions. All of these services are now available at our Bedford location.

I am very excited about my affiliation with the Cleveland Eye Clinic. This affiliation will bring to our practice an unsurpassed level of eye care.

Again, I thank each of you for allowing me to work with you and attend to your patients' eye care needs. I encourage you to continue to rely on our practice and to work with the doctors of the Cleveland Eye Clinic.

Sincerely,

Sheldon D. Kamen, M.D.

William F. Wiley, M.D.
Medical Director

Thomas M. Chester, O.D., F.A.A.O.
Clinical Director

Nagureddi Krishnan, M.D., PhD
Ophthalmological Associate

For over 60 years, the Cleveland Eye Clinic has been one of Ohio's premier ophthalmological practices, providing a variety of services. The physicians are leaders in many aspects of eye care including cataract surgery techniques and Crystalens. Other procedures include LASIK surgery, glaucoma laser treatments, radio wave surgery (CK), dry eye therapy, and the evaluation and treatment of many ophthalmic conditions. All these will be available at our new location.
